

## The Ian Wark Research Institute (The Wark™)

## What are you worth?

- Graduate starting salaries for 2006 in regional areas were marginally higher than for those employed in capital cities. (\$42,000 compared with \$40,000).
- Salaries in regional areas were considerably higher in the fields of earth sciences (by \$15,500), optometry (\$11,500), physical science (\$5000), architecture and building (\$4500) and engineering (\$4000).
- New graduates employed in capital cities earned more than those employed in regional areas in the fields of dentistry (by \$3000), economics and business (by \$4000) and accounting (by \$3000).
- The starting salary for new bachelor degree graduates aged less than 25 and in their first full-time employment was \$40,800, which was 79.7% of average earnings.
- The starting salary for females (\$40,000) was 95.2% of the starting salary for males (\$42,000).
- Over two-thirds of full-time employed graduates (68.1%) were working as professionals.

The Wark has a prized international reputation for research and postgraduate education, with an outstanding graduate employment record. It is the ARC Commonwealth Special Research Centre for Particle and Material Interfaces, a National Centre for Nano and Biomaterials, and the headquarters of the Australian Mineral Science Research Institute.

The Wark has strong links with industry, with many postgraduate projects providing students with the opportunity to work directly with industry partners. This will enable you to develop your skills and gain hands on experience in a world class research institute with many internationally recognised researchers.

When you choose a PhD or Masters program at The Wark, we will offer you:

- > First class facilities
- > An outstanding international reputation
- > Strong links with industry
- > Internationally competitive scholarships
- > Opportunities to travel within Australia and overseas.

The Wark offers PhD and Masters programs in Applied Science and Engineering. We also offer scholarships for a specialised one year honours only program – BSc(Hons) Nano and Biomaterials – and vacation work.
