

3D modeler

After graduating with a Bachelor of Visual Arts Multimedia from Latrobe University, Emily McGregor realised her degree wasn't specialised enough to get her the job she wanted. "I've been

drawing and making games since I was seven," Emily says, "What I found I needed were the practical skills that I did not get at uni." While searching Google for post graduate 3D courses she came across the AIE program.

Games engine architect

While completing a Bachelor of Computer Science degree at Monash University Benjamin (Ben) Han started, but never finished, building a battleship game. He'd heard it was extremely difficult to get into

a games company and, after several unsuccessful interviews, soon realised that his degree and programming experience building his own games would not get him the job he wanted. "So I came to AIE." 

You graduated, ⇒ ⇒ What now?

Get a job, ⇒ ⇒ But what job & how can you get it?

Global Shortage – Extra places for 2008

Currently there is a major global shortage of people with accounting knowledge and skills. The Faculty of Business and Enterprise has recently received extra funding from the Federal Government and can now offer a significantly increased number of places in its **Bachelor of Business (Accounting)**.

Swinburne is an internationally renowned and accredited provider with 50 years experience in accounting education and training. No matter what career path you are currently on, accounting will open doors for you.
