## u music

# Vic students in music final

An album put together by Victoria University students is a finalist in the prestigious international Independent Music Awards.

The Potential Unlimited II CD features 13 songs from emerging Australian bands including Ballarat's Howl, winner of the 2009 JJJ High School Bands Unearthed competition, and Cut Off Your Hands, who have since been approached to sign a recording deal.

Entrants from 77 countries were received for the awards, and the VU project is the only finalist in its College Label Release category from outside the United States.

The 65 students in the unit selected the songs for the album, negotiated with the artists, and organised production, artwork, publicity, marketing and promotion.

### One Life Stand

**Hot Chip**

EMI

With *One Life Stand* Hot Chip have created another widescreen pop masterpiece. A track that seeps through to your soul while defiantly striking a pose on the dance floor called now.

Indeed, Hot Chip have an uncanny knack of creating great singles, from the bruising *Over and Over* and the dizzying *Boy From School* to 2008's ubiquitous smash *Ready For The Floor*. Alexis, Joe, Felix, Al and Owen have constantly pushed the boundaries of what pop music can be and new single *One Life Stand* is no exception; a masterful three minute wonder that will surely sit alongside the very best in the annals of contemporary pop music.

### Heligoland

**Massive Attack**

EMI

Heligoland is Massive Attack's fifth studio album. It features guest vocals from Damon Albarn, Hope Sandoval, Martina Topley-Bird, Guy Garvey (Elbow) and Tunde Adebimpe (TV on the Radio). Long time cohort Horace Andy makes a return alongside Massive Attack founding members Robert Del Naja and Grant Marshall.

### A Chorus Of Storytellers

**The Album Leaf**

Stomp

A Chorus Of Storytellers marks the first decade for The Album Leaf, the group led by San Diego's Jimmy LaValle. In those 10 years, LaValle has gone from initial improvised home recordings to now five complete studio albums, from opening slots to leading an incredible world-touring band to the stage at Red Rocks, headlining the Metamorphose festival in Japan and performing at the Hollywood Bowl with the Incredible String Band.

### Let It Beat

**Shwayze**

Universal

This is not a sequel. That first one, the self-titled Shwayze, ushered the unlikely duo to unlikely heights. A string of multiple fueled by millions of Internet plays carried them to top ten album sales, landed them a coveted slot on the Vans Warped Tour, and turned them into reality television stars on MTV. In a wound-up world, Shwayze was a life-lesson in laid back lassitude, a coast-to-coast call to make every day a lazy day. And if success always breeds a bit of contempt, Let It Beat comes out swinging.
